

INSTRUCTIONS FOR SCALP CARE

1. If possible get someone else to help you when applying the scalp cream.
2. The hair should be parted in a criss-cross fashion at right angles using a comb and the cream applied to the involved areas. It should be left in for about 12 hours before washing out with shampoo. The cream may be applied in the morning or evening.
3. The scalp lotion can be applied after the hair is shampooed or by itself.
4. As the scalp improves apply the treatment less frequently.
