

## HOW TO USE EYE DROPS

1. Wash your hands before use.
2. Read the label.
3. Tilt your child's head back looking upwards.
4. Pull down gently on the lower lid.
5. Squeeze 1 drop into the space between the lower lid and the eye, without letting the dropper touch the eye.

6. If they squeeze their eyes shut, it is ok to lie them flat and place the drop on the eyelids, then keep lying down until they open their eye.
7. Throw away the eye drop bottle 4 weeks after opening.
