

Dr Carmen Rosu – Breast Physician

Assessment of women with any form of breast symptom or concern. Further assessment of women with a mammogram detected abnormality. Routine breast surveillance and education, complemented with breast ultrasound when indicated.

- Dedicated breast ultrasound
- Ultrasound guided FNA and core biopsies
- Ultrasound guided aspiration of breast abscesses
- Pre-operative wire localisations
- Sentinel node injections
- Post-operative ultrasound guided seroma aspirations
- Regular surveillance of breast cancer patients post surgery
