

Uri Ririki – Child Health Connection Centre

Uri Ririki – he taura o te ate.

The young progeny – the strings to the seat of one's emotions.

Your child's health is important to us. We have set up the Uri Ririki – Child Health Connection Centre to make sure your child's health checks and immunisation dates are recorded in one place.

We will share this information and your contact details with the health providers you choose so your child can get important health checks and immunisations on time.

Babies and children up to the age of six will be automatically registered. You can contact us to discuss their enrolment.

We respect your privacy and will not record any medical information about you or your child.
