

Our dedicated referrals coordinator will send you an acknowledgement and endeavour to make contact with your referral within 3 working days. We feedback the outcome of clients who consent, engage and have set a quit date.

We complete a first phone assessment to determine what type of support your patient needs. We offer a range of free, evidence-based programmes to ensure your patient has access to convenient, local and culturally appropriate support over a 3 month period.

- Drop-in clinics (casual appointments at local bases)
- Group Based Support (hourly sessions over 7 weeks)
- Home Visits (one-on-one support)
- Quit Bus (visiting local community spots)
- Rewards based programmes for stopping smoking in pregnancy
- Intensive support for people using mental health services

All advisors can provide free Nicotine Replacement Therapy (NRT) and can advise about other non-funded NRT, Bupropion (Zyban), Varenicline (Champix) and more.

Refer to us and we will take care of the rest.
